PARKING FACILITY MAINTENANCE MANUAL

Canadian Parking Association

March 1988

Updated July 2005

The contents of this technical bulletin are intended for the use of members of the Canadian Parking Association only, and any reproduction in whole or in part is strictly prohibited without the prior written consent of the Board of Directors, or its' delegate, of the Canadian Parking Association.

The material contained in this technical bulletin is meant as a guideline only, and any action to be taken with regard to any of the subjects referred to herein should only be taken after obtaining the advice and direction of a professional with demonstrated expertise in the subject.

PARKING FACILITY MAINTENANCE MANUAL

ACKNOWLEDGEMENTS

This is the second of a series of technical publications produced by the Canadian Parking Association for the benefit of its members.

Several of the principals of Read Jones Christoffersen Ltd. (RJC) donated their time to prepare this publication. Read Jones Christoffersen Ltd. provide consulting engineering services in the fields of parking planning, structural restoration and structural engineering and have offices in the cities of Vancouver, Victoria, Calgary, Edmonton, and Toronto.

The editor and principal author of this publication was Norman Webster, President of RJC. Mr. Webster has been extensively involved in the design of new parking facilities as well as the evaluation and restoration of existing structures. He has written publications and has given seminars on the subjects of design, maintenance, evaluation, and restoration of parking facilities. He is also co-chairman of the CSA Committee for Standard S413 - Parking Structures. Contributing authors were Ted Stone of RJC's Edmonton office, and Ron Mazza of RJC's Toronto office.

This updated version of the technical bulletin was prepared by Ted Stone of Read Jones Christoffersen Ltd.'s Edmonton office with editorial assistance from Carole Whitehorne and Wendy VanderMeulen of the CPA. Their contributions are gratefully acknowledged.
